

## BT-120AD

### Wireless Audio USB dongle

The AirLive Wireless Stereo Family offers incredible High Fidelity Stereo sound in a wide dynamic range from 20 Hz to 22kHz. This means wireless audio can finally deliver the strong bass and crystal high that previously only possible with traditional wired equipment.

#### AirLive Stereo Family

AirLive Wireless Stereo Family offer six models of accessories for different applications. This allows the unit to be used with your mobile phone, computer, stereo equipment, and iPod Mp3 player.

#### Listen to your PC audio wirelessly

The BT-120AD is a wireless Audio USB dongle for your Notebook or Desktop PC. When it is plugged into your PC, the audio output will change from your soundcard to the Bluetooth audio. There is no need to install driver because Windows operating system come with driver for it. When pair with our BT-120AR Audio Receiver or BT-120HP Wireless Headphone, you can listen to your PC audio wirelessly! Just turn on both devices for 90 seconds, then they will do auto pairing to find each other. It really is that simple.

As the pioneer of Wireless Stereo sound. The AirLive delivers the true high fidelity song unparallel by other competitors. When you think about wireless audio, think AirLive.
