

BT-120ADS

2-Way Wireless Audio USB dongle

The AirLive Wireless Stereo Family offers incredible High Fidelity Stereo sound in a wide dynamic range from 20 Hz to 22kHz. This means wireless audio can finally deliver the strong bass and crystal high that previously only possible with traditional wired equipment.

AirLive Stereo Family

AirLive Wireless Stereo Family offer six models of accessories for different applications. This allows the unit to be used with your mobile phone, computer, stereo equipment, and iPod Mp3 player.

Talk Skype* or Listen to Music Wireless

The BT-120ADS is a wireless Audio USB dongle for your Notebook or Desktop PC. After the driver is installed into your PC, the audio input/output will change from your soundcard to the Bluetooth audio. Therefore, you can talk and listen wirelessly away from your PC. From now, you can eliminate the need to stay by your PC when talking Skype*.

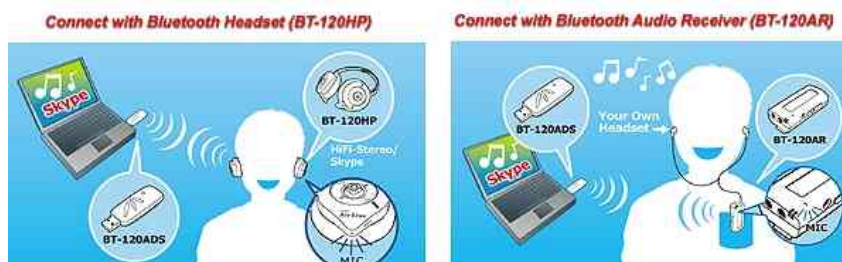

Using the included utility, you can switch between the 2-Way Bluetooth Headset mode and the High Quality Bluetooth AV mode easily. You can have the choice to pair with BT-120HP wireless Headset or the BT-120AR wireless receiver if you prefer to use your own headset.

As the pioneer of Wireless Stereo sound. The AirLive delivers the true high fidelity song unparallel by other competitors. When you think about wireless audio, think AirLive.
