

Ether-FSH2400N

24-port Rack Mountable Fast Ethernet Switch

The AirLive Ether-FSH2400N is a high performance 24-port Fast Ethernet Switch in a compact 13-inch enclosure that can be mount in 19-inch Rack. Unlike compact metal switches from other makers, It comes with built-in power supply so no external power adapter is needed.

8.8Gbps Backplane engine

The switch is equipped with a switching engine that is capable of 8.8Gbps of backplane throughput. This means that when it is processing all the connections at full speed, it can handle them with ease. The Auto MDI/MDI-X function eliminates the speed for cross over cable. So you don't need to worry about what type of device would be attached on the other end.

Specification

- Compliant with IEEE 802.3 10Base-T Ethernet
- Compliant with IEEE802.3u 100BaseTX standard
- Compliant with IEEE 802.3u Nway auto-negotiation
- Compliant with IEEE802.3x flow control for full duplex, back-pressure for half-duplex
- 24 x 10/100Base-TX Nway ports, auto MDI/MDI-X
- Store-and-Forward Ethernet packet switch method
- Non-blocking wirespeed switching architecture
- 8K MAC address
- 4Mbit Embedded memory Buffer.
- Shared frame buffer with starvation control
- Comprehensive LEDs for monitoring network diagnostics friendly
- Dimensions: 330 x 162 x 44 mm, 19" rack mountable
- Weight: 1.6 kg
- Built-in power supply: 100~240 VAC, 50 ~ 60 Hz, 0.4 A, 10 Watts max.
- Safety/EMI: meet UL, TUV, VDE, FCC Class A, CE
