

Ether-GSH24T

24-Port Unmanaged Pure Gigabit Switch

The Ether-GSH24T is a 24-port All Gigabit switch designed to be the center backbone for your network. With over 48Gbps of throughput, it can handle the the largest network with ease. Each port is compatible with 10Base-T, 100Base-TX, or 1000Base-T devices to operate with both new and legacy hardware.

Rack Mountable

The switch is enclosed in 19 inch rack mountable housing for easy integrating with the data center. The comprehensive LED display provide clear traffic status of all the ports.

Fast and reliable switching engine

The switch engine feature 8K MAC address table for large network. In addition, the 48Gbps throughput ensure wire speed performance for each and every port. AirLive test every single port in a 24 hour burn in test before each shipment to retain the legendary performance.

Leader in Gigabit Solution

AirLive was one of the very first vendor in the world to introduce Gigabit Ethernet switch, back in 1997.

The Ether-FSH24T is a real cost effective solutions to set up Gigabit centralized network. Alleviate your network traffic problem and upgrade to Gigabit Ethernet today.
