

WP-103

Wireless 3-Port Print Server

3-Port Wireless Print Server

AirLive WP-103 is a wireless printer server equipped with 3 high speed bi-directional parallel ports. The 802.11b compliant print server can work in either AdHoc or Infrastructure mode with 64/128-bit WEP encryption. Furthermore, multi-protocol support that includes TCP/IP, NetBEUI, and AppleTalk protocols ensure compatibility with most Windows, Unix, and Macintosh-based platforms. Best of all, it is equipped with 18dBm wireless output power to ensure quality reception.

Flexible Management

The Printer Server can be configured through Web browser or the supplied Windows management utility. Advance MIB-II support allows comprehensive SNMP managements. WP-103 are further equipped with DIP switch in the back panel to allow fast and easy wireless configurations. In addition, compatibility with future printers are assured with firmware upgrade ability and the legendary Air Live support.

Specification

Wireless

- Compliant with IEEE 802.11b Wi-Fi spec.
- 18dBm output power
- AdHoc(Peer to Peer) or Infrastructure mode
- 64-bit and 128-bit WEP encryptions
- DIP switch for quick configuration without using software
- Adhoc or Infrastructure
- Any ESSID or Configured ESSID

Management

- Easy configuration through Web-browser or utility program
- Latest MIB-II for SNMP-standard management

Ports

- 3 IEEE 1284 compliant printer ports
- Supports bi-directional HP PJJ protocol
- Support low or high speed settings

Power: DC5V, 2.4A

Safety/EMI: meet FCC, CE standard

- DMA channel support for high speed printing of 3
- ports simultaneously

Support Frame Types

- IEEE802.11b Wi-Fi

Supported Network Protocols

- TCP/IP, NetBEUI, AppleTalk

O.S. Support

- Windows 95/98/ME/NT/2000/XP,
- NetWare 5.x, Native NDS
- Linux
- HP-UX Unix, Sun O.S, Solaris, SCO Unix, AIX,
- Unixware
- Mac OS

LED

- Power, Link, /ACT, Wireless Quality, LPT1, LPT2,
- LPT3
- ..h
